Product Summary

Go further off grid with the Escape Ecosystem. This Escape Drivable kit comes with supplies to install the Yeti PRO 4000 in a van for convenient power on the road. When you need power for appliances in your van or RV, keep life on the road comfortable with the Goal Zero Yeti Escape Ecosystem. It's easy to power appliances and charge devices, even when you don't have access to shore power.

Product Description

Go further off grid with the Escape Ecosystem. This Escape Drivable kit comes with supplies to install the Yeti PRO 4000 in a van for convenient power on the road. When you need power for appliances in your van or RV, keep life on the road comfortable with the Goal Zero Yeti Escape Ecosystem. It's easy to power appliances and charge devices, even when you don't have access to shore power.

Goal Zero Yeti Escape Drivable Kit Highlights

The Power You Need

The Yeti PRO 4000 is the heart of your system and gives you long lasting power that can run almost any appliance. This

means you can explore further without worrying about access to shore power.

Convenient Control

Your Escape ecosystem is app enabled for easy control of your devices while you're on the road. You can also install the Smart Control Display that lets you power the system on and off and gives you extra information about your Yeti PRO.

Easily Scalable

Need more power for heavy-duty appliances, power tools, and longer adventures? Expand your system with the Tank PRO 4000 and solar. The Tank PRO is a high-capacity expansion battery that integrates seamlessly with the rest of your system. And we offer both installable and portable solar so you can choose between mounting panels on your vehicle or unfolding lightweight panels when you stop and stay somewhere for a while.

Versatile Power Options

This kit gives you the wiring you need to recharge the Yeti PRO using shore power or solar power. Once the kit is installed in your vehicle, it replaces the OEM power system.

Escape Kit Components

Part# : 44569

12V Locking HPP to Flying Leads Output Cable - Length: 8' - Wire Gauge: 10AWG - Current Rating: 30A

Flying Leads to Solar HPP+ Input Cable - Length: 8' - Wire Gauge: 10AWG - Current Rating: 40A

TT-30P to Flying Leads Output Cable - Length: 8' - Wire Gauge: 10AWG - Current Rating: 30A (120V)
