Product Summary

Also known as a 'battery separator' or 'charge isolator', The ACR-160 is a voltage-dependent switch that separates or parallels starter & auxiliary batteries in order to protect the starter from deep discharge, and properly recharge the two battery banks.

Product Description

Also known as a 'battery separator' or 'charge isolator', The ACR-160 is a voltage-dependent switch that separates or parallels starter & auxiliary batteries in order to protect the starter from deep discharge, and properly recharge the two battery banks.

Features...

Microprocessor controlled, dual sensing

Easy to install - does not require changing the existing circuit of the alternator

Potted, waterproof, sealed unit

Low standby current

Automatic detection of 12 or 24 VDC systems

160 Amp continuous rated, 480 Amp peak (250 msec)

Monitoring of relay activation by external LED

Over voltage protection

Specifications...

Input

12/24 VDC

Output

12/24 VDC

Amps

160

Warranty

2 years (Canada/US)

Applications...

Marine

Automotive

Recreational
