### Product Summary

The one charger to take with you on expeditions. If you need to charge a variety of batteries, or would rather not worry about buying a new charger every time you purchase a new camera, then the DigiCharger Vario is for you.

### Product Description

The Ansmann DigiCharger Vario Pro adapts itself to just about every battery pack

available. Cameras & Camcorders. Ansmann doesn't even publish a compatibility list for this reason. Place your camera battery into the cradle, adjust the contacts, and you are charging. Use a wall outlet, or your car's cigarette socket.

The Digicharger Vario Pro is an excellent charger for nearly all Li-Ion battery packs for digital cameras, camcorders and mobile phones, but it just got better.

With the new Digicharger Vario Pro it is possible to do many more things. A charging current of 1000 mA provides short charging-times and contacts that are adjustable in both horizontal and vertical direction make it possible to charge nearly all Li-Ion battery packs, even those with a small contact area.

As an additional feature the "Pro" can be used as an energy source for USB applications, for example MP3 or computer devices. If needed, it is possible to use a connected Li-Ion battery pack as an emergency power source for USB devices.

The Digicharger Vario Pro, equipped with LCD -display, can be used worldwide (adaptors for EU, UK and USA are in the set) or in-car.

If you choose one charger to take with you on expeditions, this should be the one.

Ansmann Digicharger Vario Pro Specifications...

Wide input range for worldwide use

North American & European adaptors (100-240V)

12V car adaptor

Battery Sizes & Types

AA/AAA

Lithium-ion & lithium-polymer battery packs for phone, cameras, camcorders

COMPATIBILITY NOTE: So far, the LP-E6 is the only common dSLR battery pack we have come across that will not fit the Ansmann Vario Pro (indeed, the LP-E6 is not able to fit any universal charger that we know of). Use a dedicated LP-E6 charger if this battery is needed.

3.6v / 3.7v

7.2v / 7.4v

Max Battery Fit Dimensions

7.3cm (2-7/8") long (unlimited width)

Speed

High charging currents provide short charging times

Care

Long lifetime of the rechargeable batteries due to an optimum charging control circuit

USB-output

Is available for charging USB devices from your charged camera battery

USB power supply

Mobile charging of USB applications using an inserted battery pack without connection of the power supply

Safety

Faulty cell detection and over charge protection

- Warranty: 3 years

Dimensions:

3 x 5.1 x 1.5"

7.6 x 13 x 3.8cm

Approx 40g
