Product Summary

The simplest universal charger yet. Instead of adjustable contacts like other universal chargers, the Ansmann Powerline Easy uses a series of pins that make contact with your battery automatically when you insert the battery. Even batteries with narrowly placed contacts like the LP-E6! Charge 3.6-7.4V batteries from USB...

the charger handles voltage & polarity for you.

\$2 CLOSE-OUT SALE! When they're gone, they're gone!

Product Description

Looking for the easiest to use camera battery charger? You've found it.

This is the Ansmann Powerline Easy Universal camera charger for Li-Ion & Li-Po battery packs from Canon, Nikon, Panasonic, Sony, Olympus, and all others. It is the simplest universal camera charger yet. Instead of adjustable contacts like other universal chargers, the Ansmann Powerline Easy uses a series of pins that make contact with your battery automatically when you insert the battery. Even batteries with narrowly placed contacts like the Canon LP-E6!

Charging dSLR batteries?

Most mobile electronics follow the USB format. USB car chargers & portable battery packs are easy to come by (the best are featured on this site of course!). Normally it is not possible to charge a 7V battery pack from a 5V USB source. But the Ansmann Powerline Easy transforms the charging voltage to the 8.4V level necessary to charge 7.2 & 7.4V battery packs.

Charging smaller camera batteries is easy work for the Ansmann Powerline Easy. It reduces the 5V USB voltage down to the 4.2V range these batteries want.

Is it as good as dedicated battery chargers?

Better. The Ansmann Powerline Easy checks the applied voltage, sets the polarity, and sets the charging rate for safe and reliable charging. The control circuit in your camera battery itself lets the charger know when the battery is full, as it does with all chargers.

The best part is having a single charger that can charge all your various camera batteries (with the exception of AA's). No more packing several chargers, or overseas voltage converters.

.

Ansmann Powerline Easy Features & Specifications...

- Multi-contact system - automatic detection of the charging contacts - Compatible with almost all Li-Ion and Li-Po battery packs for cameras, camcorder, smartphones, etc. - Automatic voltage and polarity detection - Charging starts automatically when a battery is connected - Microprocessor controlled charging - Short circuit detection, faulty cell detection, overvoltage protection - Automatic battery full detection - Indication of the charging status via LED

Package Includes...

- USB-to-Micro USB charging cable - Dual USB power adaptor (100-240V AC / 50-60hz) - USB 12V car adapter (12-24V DC)

3 years extended warranty
