Product Summary

The CBBF-MBC is an MRBF battery terminal fuse block by Eaton Bussman. The simple way to add overcurrent protection to battery circuits when space is limited, or you want to follow best practices by having battery breakers and fuses as close to the source as possible.

Product Description

The CBBF-MBC is an MRBF battery terminal fuse block by Eaton Bussman. The simple way to add overcurrent protection to battery circuits when space is limited, or you want to follow best practices by having battery breakers and fuses as close to the source as possible.

For use with all [CBBF / MRBF](#) type fuses up to 300A.

Provides high current protection in tight space locations. Ideal circuit protection for DC Main branches.

Requires optional [CBBF / MRBF](#) fuses which are sold separately.

Optional fuse sizes are: [50](#), [60](#), [80](#), [100](#), [150](#), [200](#), [250](#) and [300](#) Amps.

CBBF-MBC Battery Terminal Fuse Block Specifications

- Manufacture: Eaton / Bussman - Type: Battery Fuse Mounting Bar Assembly - Terminal Stud Size: 1/4" - 20 stud, nut and cover - Amperage: 35A - 300A (fuses sold separately) - Maximum Voltage: 58V DC

Product Attributes

- Dimensions: 1 × 1 × 1 cm
- Weight: .2 kg
