[Who Is Powertraveller?](#)

Powertraveller has been on the portable solar equipment scene in Europe since 2003.

Powertraveller products are built to last, are capable of being used in extremes of temperature and are resistant to the elements and harsh handling. They have a very high number of recharge cycles negating the need for using disposable batteries and are made using components and materials that can be reused or recycled.

Powertraveller is on a mission to enable our customers to enjoy nature on their own terms with the help of lightweight, portable power sources. Technology helps us get the most out of the time we spend outdoors: It keeps us connected with our loved ones and fellow adventurers, lets us capture unforgettable moments and charges critical devices in the field.

Yet a relaxing weekend in the fresh air can quickly turn into a frustrating or even dangerous situation when a device is low on power. So, for more than fifteen years, Powertraveller has been designing, developing and manufacturing award-winning portable power and solar solutions that extend the usability of a wide range of electronics.

Powertraveller History...

2003: Powertraveller founded in Europe

2006: Powertraveller products used by scientific research groups in Antarctica who require charging at below 30°F

2008: Launch of military tactical line

2010: Launch of Extreme product line used by athletes and extreme adventurers worldwide. MPPT technology patented and launched by Powertraveller

2011: Products launched into United States

2013: First shipments to REI stores. Powertraveller forms partnership with Red Bull for X-Alps adventure race event

2016: Products used by Team Dimension Data in Tour De France

2017: Powertraveller is acquired by global organisation Memory Experts to meet larger operational demands

2018: Falcon series global release, Sport 25 series global release

2019: Nightjar lamp global release
