Product Summary

One of Enphase Energy's most popular system add-ons. This is the CT-200-SPLIT consumption monitoring CT (split core current transformer). When used in conjunction with an IQ Envoy, or Envoy™ S Metered, these current transformers (CTs) allow for consumption monitoring.

Package includes a single CT.

Product Description

One of Enphase Energy's most popular system add-ons. This is the CT-200-SPLIT consumption monitoring CT (split core current Transformer). When used in conjunction with an IQ Envoy, or Envoy™ S Metered, these current transformers (CTs) allow for consumption monitoring.

Package includes a single CT.

CT-200-SPLIT Features

- Install two CTs to keep track of split-phase use.
- Enable whole-home consumption metering with an accuracy of +/- 2.5%.
- For Residential Use Only.
- Includes 8' 18AWG wire.
