Product Description

The EnerPlex Generatr 100 is a lightweight and portable power solution for a wide array of consumer electronics. It is easily integrated into portable solar charging systems, and offers several advantages to other portable universal battery packs. The Enerplex Generatr 100 has USB outputs for phones and tablets, a 12V port for lights & car accessories, a 19V port that covers most laptops including MacBooks, and a standard AC wall outlet for your devices that don't have a DC option.

Charge the Generatr 100 via wall outlet, or sun using EnerPlex's patented solar panels.

Powering Laptops...

Use the 19V port along with the power cable & appropriate connector tip for your laptop. Provided with the kit are: M9 tip for Dell, M20 tip for HP, and M11 tip for Thinkpads.

You also have the option of using the built-in AC power outlet. The built-in inverter provides household AC power to a maximum of 100 Watts.

NOTE: Using the inverter will consume additional battery power, so we recommend using only when a DC connection option is not available for your device.

Powering USB devices...

Two USB ports are provided, each with a maximum charge rate of 2.4A at 5V USB. Fully universally compatible, for all USB devices including Apple.

Powering CPAP & Medical Equipment...

Most portable CPAP machines offer 12V DC car input options. In this case, connecting your equipment to the Generatr 100 via the 12V port will provide you with power for 1 night (check options for running your equipment in the 10W range - ie without humidifier).

Enerplex Generatr 100 Specifications...

- 94 WHrs portable battery - USB, 12V, 19V Laptop Port, and integrated AC Inverter Outputs - Can charge any electronic device up to a laptop - Dual Charging Capabilities - Recipient of the 2015 Red Dot Product Design Award
