Product Summary

Get better charging performance, with less weight. This Ultralight Trek North solar charger is built around the best all-around solar cell technology, giving you reliable performance at all latitudes, altitudes, & sunlight conditions. The ideal solution for extended trips with only a couple of small USB devices to support.

Product Description

The Enerplex Kickr 1 & Jumpr Mini bundled to provide you with better charging performance & less weight. This Ultralight Trek North solar charger is built around the best all-around solar cell technology, giving you reliable performance at all latitudes, altitudes, & sunlight conditions. The ideal solution for extended trips with only a couple of small USB devices to support.

The Enerplex Kickr 1 & Jumpr Mini will solar charge satellite phones, GPS receivers, handheld VHF radios, headlamps, small camera batteries, and just about any USB device. This is a Canadian solution, with solar panels made from solar cells that outperform crystalline cells in our Canadian climate & latitude.

The Enerplex Kickr 1 solar panel is comprised of 1.5 Watts of highly sensitive solar cells. Power is stored in the Enerplex Jumpr Mini - one of the smallest lightweight battery packs on the market, capable of supporting everything USB. The Kickr 1 CIGS solar panel used in this set will 'turn on' earlier in the morning & 'turn off' later in the afternoon than crystalline types of solar cell, which means that you will collect more overall power in low-light, partial shade, light overcast, and high latitude conditions than crystalline cells. After all, it's not the efficiency of the cells in full sunlight that matters when you never get full sunlight!

Ready To Go...

This package is ready to use right out of the box. Solar panel, battery pack, & connector cables.

Total Core Package Weight: 325g (235g if you leave the nylon case at home!)

Be sure to check out our recommended accessories tab.

The Enerplex Kickr 1 Solar Panel...

Wattage: 1.5W

Type: CIGS (made in the USA)

Manufacturer: Enerplex/Ascent

Mounting: Loops on panel, mini bungee cords provided with kit

Advantages:

- High sensitivity, providing maximum watt-hours generated per day across all sunlight conditions.
- Removeable nylon canvas backing

Dimensions: 36.2 x 19 x 1.8cm / 14.25 x 7.5 x 0.71"

Weight: 275g / 9.7oz

The Jumpr Mini Solar Storage Battery...

Capacity: 1,700 mAh (6.3 WHr)

Type: Lithium-Polymer

Input: Micro USB Port

Output: Tethered Micro-USB (with full female USB port adaptor)

Power Output: 5V/850mA

Dimensions: 9.0 x 5.8 x 0.79cm / 3.5 x 2.3 x 0.3"

Weight: 54g / 1.9oz

Warranty: 1 Year

Product Attributes

- Dimensions: 1 × 1 × 1 cm
- Weight: 0.9 kg
