Product Summary

This is the FlashLoc Duo Comp Kit. An elegant deck or rafter mount for solar rails, which includes 2 rafter screws, sealant and rail T-Bolt (the T-Bolt is built for Unirac rails - check with us on their fit with other rail systems, or use the bolting system for your specific rails). The FlashLoc Duo is available in silver (mill) or dark finish.

Product Description

This is the FlashLoc Duo Comp Kit. An elegant deck or rafter mount for solar rails. The full kit hich includes 20 mounts, 2 rafter screws for each, sealant and rail T-Bolts for each. The T-Bolt is built for Unirac rails - check with us on their fit with other rail systems, or use the bolting system for your specific rails. The FlashLoc Duo is available in silver (mill) or dark finish.

The FlashLoc Duo all-in-one mount installs fast - no kneeling on hot roofs to install flashing, no prying or cutting shingles, no pulling nails. Simply drive the required number of screws to secure the mount and inject sealant into the base. The patented TRIPLE SEAL technology of FLASHLOC™ preserves the roof and protects the penetration with a permanent pressure seal.

Kitted with two rafter screws, sealant and hardware for maximum convenience (additional deck screws sold separately). Don't just divert water, LOC IT OUT!

FlashLoc Duo Features - Install a high-strength waterproof attachment without lifting, prying or damaging shingles - With an outer shield contour-conforming gasket and pressurized sealant chamber the Triple Seal delivers a 100% waterproof connection - Simply drive the required number of screws and inject 4 sealant into the port 4 to create a permanent pressure seal
