## Product Summary

This is the FlexPower 4 Fully Pre-Wired 14.4kW Quad Inverter System by Outback Power systems. The FLEXpower pre-wired power panels integrate VFXR3648A-01 inverter/chargers, FM80 or FM100 charge controls, and all of the essential

protective devices in an easy-to-install, fully pre-wired and factory-tested system. The right way to build a large off-grid system for homes, lodges, & resorts.

## Product Description

This is the FlexPower 4 Fully Pre-Wired 14.4kW Quad Inverter System by Outback Power systems. The FLEXpower pre-wired power panels integrate VFXR3648A-01 inverterchargers, FM80 charge controls, and all of the essential protective devices in an easy-to-install, fully pre-wired and factory-tested system. The right way to build a large off-grid system for homes, lodges, & resorts.

Each **FP4** is designed for 120/240 VAC single-phase output. Each power panel includes four VFXR3648A-01 inverter/chargers, four FM80 charge controllers, FlexNetDC, AC and DC wiring boxes, a MATE3s, HUB10, and an AC/DC Surge Protector, inverter and controller breakers with GFDI, and an AC Input-Output-Bypass Assembly. Dimensions are 59"W x 46"H x 13"D. Weight is 520 lbs.

OutBack's pre-assembled and pre-wired FLEXpower systems are equipped with the OutBack VFXR3648A-01 **FXR / VFXR™ Series inverter/chargers**. This means that the most advanced inverter features are now available on the industry's most trusted and proven systems platform, for unmatched flexibility and value.

- Two models available for 120/240VAC applications, ranging from 12kW to 14.4kW - 50Hz/60Hz selectable for regional diversity - Programmable for seven different modes including GridZero, which blends utility power and stored renewable energy, minimizing grid dependence; also support mode for seamless generator integration - Advanced Battery Charging (ABC) with expanded charging voltages and time parameters accommodates charging profiles of new and emerging storage technologies including lithium ion, and aqueous types - Field-upgradability eliminates system down-time for critical updates - Remote system control and monitoring available through any internet-enabled device with OPTICS RE

The FLEXpower FOUR is ideal for split-phase applications with large power

requirements such as larger residential, commercial or village power systems, with all necessary components integrated into a compact hang-on-the-wall system with a minimal footprint.

### FlexPower 4 Highlights

- Factory tested, pre-wired and pre-configured systems
- Fast installation—just hang on the wall with the bracket (included) and make connections
- Off-grid and grid-tied functionality in one flexible system
- Powerful system in a compact, space-saving footprint
- Field-upgradable software
- Ample AC and DC breaker provisions
- GridZero technology effectively lets users “zero out” the utility grid if enough renewables are present, reducing or even eliminating grid dependence
- Advanced Battery Charging (ABC) supports a wide range of battery technologies including lithium-ion
- All components carry necessary ETL certifications

### FlexPower 4 Physical Specifications

Finished Dimensions H x W x D (in/cm) : 46.0 × 46.0 × 13.0 / 116.84 × 116.84 × 33.02

Finished Weight\* (lb/kg) : 500 / 226
