### Product Summary

This is the Grundfos SQFlex Submersible Solar Pump : 11 SQF-2

Grundfos SQFlex Submersible Pumps offer the basis for a complete off-grid water supply system. Built with flexibility in mind, the 11 SQF-2 pump is able to run efficiently from either AC or DC power, and incorporates a built-in MPPT controller and soft-start. This model is a helical rotor pump, ideal when up to 120m (395') of lift is required, and up to 52 L/min (13 Gal/min).

## Product Description

This is the Grundfos SQFlex Submersible Solar Pump : 11 SQF-2

Grundfos SQFlex Submersible Pumps offer the basis for a complete off-grid water supply system. Built with flexibility in mind, the 11 SQF-2 pump is able to run efficiently from either AC or DC power, and incorporates a built-in MPPT controller and soft-start. This model is a helical rotor pump, ideal when up to 120m (395') of lift is required, and up to 52 L/min (13 Gal/min).

When the solar resource is unreliable, the Grundfos SQFlex pumps can be integrated with battery back-up systems.

### 11 SQF-2 Pump Applications

SQFlex pumps are designed for continuous & intermittent operation, and are ideally suited to...

- Residential : Villages, schools, hospitals, single-family houses, etc. - Farms : Watering cattle, Irrigation of fields or greenhouses - Surface water pumping : Water from ponds and lakes

### Grundfos 11 SQF-2 Features

- Runs from either DC or AC power : 30V - 300V - Built-in electronics make for simple installation - Extremely reliable - Low operating costs - Dry-running protection - Built-in motor protection - High efficiency - Built-in maximum power point tracking (MPPT) - Wide voltage range - Built-in sand shield

### Grundfos 11 SQF-2 Pump Specifications

- 47" L x 2.9" diameter - 17 lbs - Voltage (DC): 30 - 300V - Voltage (AC): 90 - 240V - Max head/pressure: 395' / 170 psi

### Flow Rate:

12.5 gal/min @ 15' (250W Power)

10 gal/min @ 395' (1400W Power)

- Connection: 1" NPT - Stainless steel housing - Model number: 11 SQF-2
