Product Summary

The Harrier 25 is a versatile charging solution for anyone on the go. This portable, wireless power pack features an elastic strap to safely & securely attach a smartphone or other 5V device to the battery while recharging. If wireless charging isn't an option your device offers, the Harrier 25 also allows for standard USB charging with the included cable. Smart charging with automatic on/off detection technology is provided via the bi-directional USB-C port.

Product Description

The Harrier 25 is a versatile charging solution for anyone on the go. This portable, wireless power pack features an elastic strap to safely & securely attach a smartphone or other 5V device to the battery while recharging. If wireless charging isn't an option your device offers, the Harrier 25 also allows for standard USB charging with the included cable. Smart charging with automatic on/off detection technology is provided via the bi-directional USB-C port.

Harrier 25 Features...

Rugged, tough casing with a waterproof and dustproof rating of IP65 - the Harrier 25 can withstand knocks and spills when you're off the beaten track.

Weighing just 220g, slip it into your pack or bag without taking up precious space.

The Harrier 25 offers truly versatile portable power via the wireless charging pad, plus the added benefit of being able to charge via the USB socket simultaneously. No bulky chargers with tangled cables - just simple yet efficient power on the move.

What can the Harrier 25 recharge?

Smartphone - 2 to 3 times | Sat Phone - 2 times

GPS - 2 to 3 times | Action Camera - 3 to 4 times

Smartwatch - 15 to 26 times | Headtorch - 5 to 9 times

All 3 ports may be used at the same time, with reduced output on each.

Charge your Harrier from any USB port using the included USB-to-USBC cable.

Pass-Through Charging

The Harrier, like all Powertraveller battery packs, offers pass-through charging. This means that it can charge your phone or other USB devices while it is connected to a

charging source. Priority is given to your device. Note that you won't find this feature on standard USB battery packs that aren't designed for use with solar - it takes a solar battery to be this smart.

This feature is especially important for solar charging, as it allows you to keep your solar panel and device connected to the Harrier while you are hiking, kayaking, cycling, or camping, and harvest sunlight whenever it is available, and at whatever intensity it happens to be.

Best Solar Panel Options

Want to pair your Harrier with a solar panel for charging away from civilization? Here are our recommendations...

[Powertraveller Extreme 5W Folding](#)] [Powertraveller Falcon 7W](#)] [Voltaic 3.5W Rigid](#) [Voltaic 5.5W Rigid](#) [Voltaic 6W Rigid](#)] [Voltaic 9W Rigid](#)] [Voltaic Arc 10W](#)] [Goal Zero Nomad 5](#)] [Goal Zero Nomad 10](#)

NOTE: A 3W panel will take approx 1 full summer day to charge the Harrier from 50% to full, while a 10W panel can do it in as little as 1.5 hours.

Harrier 25 Specifications

- Wireless charger with 6700mAh/24.8Wh
- 1x USB-C input/output: PD 15W
- 1x USB output: 5V/3A Quick Charge
- 1x wireless output: 10W Quick Charge
- Elastic strap to hold smartphone
- Smart charging: automatic on/off detection (USB-C)
- 4 LED battery charge indicator
- Waterproof and dustproof to IP65 rating
- Rugged design
- Weight: 220g
- Size: 86mm x 86mm x 25.5mm

In The Box...

1 x Harrier 25 power pack

1 x USB-C to USB cable

Who Is Powertraveller?

Powertraveller has been on the portable solar equipment scene in Europe since 2003.

Powertraveller products are built to last, are capable of being used in extremes of temperature and are resistant to the elements and harsh handling. They have a very high number of recharge cycles negating the need for using disposable batteries and are made using components and materials that can be reused or recycled.

Powertraveller is on a mission to enable our customers to enjoy nature on their own terms with the help of lightweight, portable power sources. Technology helps us get the most out of the time we spend outdoors: It keeps us connected with our loved ones and fellow adventurers, lets us capture unforgettable moments and charges critical devices in the field.

Yet a relaxing weekend in the fresh air can quickly turn into a frustrating or even dangerous situation when a device is low on power. So, for more than fifteen years, Powertraveller has been designing, developing and manufacturing award-winning portable power and solar solutions that extend the usability of a wide range of electronics.
