Product Summary

The Fast-Rack Hidden End Clamp (HEC) is a concealed module clamp that integrates seamlessly with the Fast-Rack Ultra rail system. The HEC mounts underneath the module, making it completely hidden. It can be installed anywhere along the rail, and allows ends to be trimmed flush with the module for the cleanest installs possible.

Product Description

The Fast-Rack Hidden End Clamp (HEC) is a concealed module clamp that integrates seamlessly with the Fast-Rack Ultra rail system. The HEC mounts underneath the module, making it completely hidden. It can be installed anywhere along the rail, and allows ends to be trimmed flush with the module for the cleanest installs possible.

Hidden End Clamp Specs

Fits all solar module frame flanges
