Product Summary

This is your home run PV cable for running from your array down to your combiner box or charge controller. This solar PV wire (#10AWG, RPVU90) comes with a female MC4 connector at the end for simple connection to the positive line coming from your array. For use with solar panels & systems that use the standard MC4 connectors or compatible (which is most of them).

Product Description

This is your home run PV cable for running from your array down to your combiner box or charge controller. This solar PV wire (#10AWG, RPVU90) comes with a female MC4 connector at the end for simple connection to the positive line coming from your array. For use with solar panels & systems that use the standard MC4 connectors or compatible (which is most of them).
Cable is RED, with female MC4 on one end (female housing/male terminal)
Single cable, stranded copper conductors, #10 AWG PV cable (UV resistant) RPVU90
1000V Rating to accommodate long array strings.
PRICE IS PER METER, OR PER FOOT - SO YOU CAN ORDER EXACTLY THE LENGTH YOU NEED
