## Product Summary

Looking for a simple, cost-effective, and completely water-tight way to attach solar to your roof? Consider the HUG by Quick Mount / Ironridge. This is a sealed surface roof attachment for composite shingles that saves you time and money by integrating the L-foot and footing into a single product.

## Product Description

Looking for a simple, cost-effective, and completely water-tight way to attach solar to your roof? Consider the HUG by Quick Mount / Ironridge. This is a sealed surface roof attachment for composite shingles that saves you time and money by integrating the L-foot and footing into a single product.

Many asphalt shingles have bonded courses. A mount that protects without the need to pry shingles can really speed things up. Instead of purchasing a flashing attachment and L-foot and worrying about whether you accurately targeted your rafters from the top-side, you can place the HUG where you want it and either target the rafter or simply attach to the roof deck (ie underlay sheeting) using as many as 6 structural screws (2 screws come with

Like all Ironridge and Quick Mount PV products, the HUG is here to respect the roof. Its Halo is a cast-aluminum barrier that encases the UltraGrip™, our industrial-grade, foam-and-mastic seal. This allows HUG™ to accelerate the installation process and provide the utmost in waterproofing protection.

Solar attachments must be dependable for the lifetime of a home's rooftop. Give your roof a HUG.™

### HUG Features & Benefits

#### Multi-Tiered Waterproofing

HUG™ utilizes a multi-tiered stack of components to provide revolutionary

waterproofing protection. The Halo cast-aluminum, raised-perimeter foundation surrounds the UltraGrip™ base—a foam-backed mastic seal combination that prevents water intrusion by adhering and sealing with the shingle surface.

### UltraGrip™ Seal Technology

HUG™ UltraGrip™ utilizes a state-of-the-art seal design that uses a unique, foam-and-mastic combination. The foam-backed adhesive provides an entirely new flashing system that conforms and adheres to every nook and cranny of composition shingles, filling gaps and shingle step-downs (up to 1/8" in height).

### Rafter & Deck Mounting Options

Mount HUG™ to the roof rafters, the roof deck, or both with our custom-engineered RD (rafter-or-deck) Structural Screw. The RD Structural Screw anchors HUG™ to the roof with an EPDM sealing washer, completing the stack of waterproofing barriers.

**But before you decide to attach to a rafter, please read our [blog post on this subject!](#)**
