## Product Summary

The Enphase Q Cable is a modern two-wire #12AWG PV cable that is 50% lighter than previous generations of Enphase Cables and only requires two wires with no neutral or ground. The Enphase Q Cable is part of the Enphase IQ System. All Enphase accessories are designed to provide convenience, dependability, and quicker installation times.

## Product Description

The Enphase Q Cable is a modern two-wire #12AWG PV cable that is 50% lighter than previous generations of Enphase Cables and only requires two wires with no neutral or ground. The Enphase Q Cable is part of the Enphase IQ System. All Enphase accessories are designed to provide convenience, dependability, and quicker installation times.

These drop cables feature plug-and-play connectors that ease wire management and reduce installation time. Cable waste is no longer an issue thanks to new link connectors. Portrait 60-cell or 72-cell (Q-12-10-240), landscape 60-cell (Q-12-17-240), or landscape 72-cell (Q-12-20-200) modules include the Q cable. These cables are available in both cut-to-order and full-spool quantities.

Full Spools are 300m in length (984')

- Free Shipping applies to full spools, and orders over \$199 **Q Cable Features**

**Highlights** - The two-wire Enphase Q Cable is 50% lighter than the previous Enphase cable generation. New cable numbering and plug-and-play connections ease wire management and speed up installation. Cable waste is eliminated with the use of connection connectors.
