Product Variants

- Ironridge UFO Solar Module Clamp - Black ()
- Ironridge UFO Solar Module Clamp - Mill ()

Product Summary

The Ironridge UFO family of components eliminates the need for separate grounding hardware by bonding solar modules directly to IronRidge XR Rails. By

itself, the UFO is your module array mid-clamp piece. Available in Black or Mill finish. Add a stopper sleeve to turn it into an end-clamp.

Product Description

The Ironridge UFO is an elegant attachment for your solar modules. The UFO eliminates the need for separate grounding hardware by bonding solar modules directly to IronRidge XR Rails. By itself, the UFO is your module array mid-clamp piece. Add a stopper sleeve to turn it into an end-clamp. Available in Black or Mill finish.

UFO hardware forms secure electrical bonds with both the module and the rail, resulting in many parallel grounding paths throughout the system. This leads to safer and more reliable installations. All system types that feature the UFO (Flush Mount, Tilt Mount and Ground Mount) are fully listed to the UL 2703 standard. Ironridge Universal Fastening Object (UFO) Features...

The UFO securely bonds solar modules to XR Rails. It comes assembled and lubricated, and can fit a wide range of module heights.

UFO Stopper Sleeve

The Stopper Sleeve (available separately to fit specific module frame heights), snaps onto the UFO, converting it into a bonded end clamp.

Product Attributes

- Dimensions: 1 × 1 × 1 cm
- Weight: .2 kg
- Finish: Black, Mill
