### Product Summary

Ingenious! An ultra-thin USB battery pack with binder holes so it fits in any ring binder. Ideal for field workers who need to keep their electronics charged. Dual 2.4A capable USB ports provide all the power your devices need. Connects to your favourite USB solar panel too.

### Product Description

Ingenious! An ultra-thin USB battery pack with binder holes so it fits in any ring binder.

The Enerplex Jumpr Slate 10K is ideal for students & faculty who depend on their phones & tablets. It is also an essential power accessory for field workers who work with cameras, data loggers, tablets, phones, satellite phones, & more.

Features...

The EnerPlex Jumpr Slate 10K™ is the thinnest battery solution for charging smartphones, tablets and e-readers. Its dual 2.4 amp outputs allow users to charge two devices at once so you can always make sure all of your devices are powered up.

- Dual 2.4 amp outputs allow users to charge two devices, even tablets, at once
- Charges smartphones, tablets, cameras, GPS, MP3's and more.
- Binder holes to easily place in folders and planners
- Extremely tough construction to handle the bumps of everyday use.
- Red Dot Design Award Winner

Connectivity...

The Enerplex Jumpr Slate 10K features dual 2.4A capable USB ports. These provide all the power your devices need, for charging at maximum speed.

The ports are universal, so they will handle androids as well as Apple iPhones & tablets. Iridium satellite phones with USB input, GPS receivers, GoPro cameras, and more are all compatible.

Want to charge cameras? The best option is to use a [Universal USB camera charger](#) like the [Ansmann PL Vario](#). This will adapt to every camera battery size, and will handle 3.6/3.7V packs in addition to 7.2/7.4V packs.

Pass-Through Charging...

Here's a little feature that most USB battery pack companies don't talk about: Pass-Through charging. This is the ability of a battery pack like the Jumpr Slate 10K to charge other devices while it is being charged. That's right... you don't need to wait until your Jumpr has adequate power before plugging in your tablet. The Jumpr Slate 10K's advanced control circuitry will handle both for you.

All the battery packs that we sell have this feature, because they are designed to work with solar. But most big box store brands leave out this functionality for some lame reason.

Solar-Ready...

Want to extend the power you draw from the Slate 10K? Add a [USB solar panel!](#)

The Jumpr Slate 10K connects to your favourite USB solar panels, and can charge all your devices while it soaks-up power from the sun.

Enerplex Jumpr Slate 10K Specifications...

- Dimensions: 213 x 139.6 x 6.67mm / 8.39 x 5.47 x 0.26" - Battery Capacity: 10,000 mAh (37 Watt-Hours) - Battery Type: Lithium-Polymer - Recharge By: Micro USB - Input: Micro USB Port - Output: Dual USB Ports - Power Output: 2.4 Amps - Warranty: 1 Year
