Product Summary

The Goal Zero Light-A-Life 350 is a bright LED light providing a warm 350 Lumens, and adjustable shade. Plus high/low setting and integrated cord makes this the perfect light for every adventure. Ideal for pack-in/pack-out seasonal cabins, work camps, base camps, and more.

Product Description

The Goal Zero Light-A-Life 350 is a bright LED light providing a warm 350 Lumens,

and adjustable shade. Plus high/low setting and integrated cord makes this the perfect light for every adventure. Ideal for pack-in/pack-out seasonal cabins, work camps, base camps, and more.

Goal Zero Light-A-Life Features

Multipurpose Light

Adjustable shade design for broad area light or warm lantern light with high/low settings. Perfect for an outdoor camp or inside a tent.

Easy to Hang, Chain and Store

Built-in carabiner and magnets so it's quick to hang anywhere. Chainable with up to 8 lanterns. Features convenient cable storage.

Power from 12V Power Packs and Solar Generators

Low-power draw for extended runtimes. Requires a Power Pack providing 12V output such as the [V72](#)], [EnergyBar 100](#)], or **Yeti 150**, [400](#)], or **1250 Solar**

Generator.

Ready for Outdoor Use: Unexpected rainstorms probably won't harm the light. The Light-A-Life has been engineered to withstand the elements, including rain and snow. Although it's tough enough to withstand a storm, the Light-a-Life should not be submerged in water and all ports/plugs should be dry before turning on or chaining.

Chaining

You can chain up to 8 Light-a-Lives together. Ensure each light is turned on prior to hanging. This allows you to turn the entire string on/off by controlling the first light in the series. If you own the previous Light-a-Life, they are chainable to this new version.

Warning: While in use, the metal neck of the Light-a-Life will become hot to the touch. It is still safe to wrap the cable around the metal neck while in use.
