Product Summary

The **MH-C490F Stealth Two-Hour Compact 4-Bank 9V NiMH Battery Charger** from **PowerEx** is a compact charger for 1 to 4 9V rechargeable batteries. It can properly handle several variations in 9V battery design: 7.2V, 8.4V or 9.6V NiMH rechargeable batteries.

Product Description

PowerEx MH-C490F 9V Battery Charger for 9V NiMh rechargeable batteries.

The **MH-C490F Stealth Two-Hour Compact 4-Bank 9V NiMH Battery Charger** from **PowerEx** is a compact charger for 1 to 4 9V rechargeable batteries. It can properly handle several variations in 9V battery design: 7.2V, 8.4V or 9.6V NiMH rechargeable batteries.

The MH-C490F has a Delta-V based microprocessor, which charges batteries to their full potential. The microprocessor automatically switches from rapid charge to trickle charge after the batteries are fully charged to ensure that they maintain their total capacity. Additionally, FLEX pulse charging conditions and enhances battery performance during charging.

MH-C490F Charger Features

- Small size (2.5 x 3" / 6.4 x 7.6 cm) is ideal for storage virtually anywhere, as well as for transport - Charges 1-4 7.2V, 8.4V or 9.6V NiMH rechargeable batteries in 120-160 minutes--so you need not wait overnight for a full charge. Rejuvenate your batteries quickly when you're on-the-go--even in the car - Car adapter included so you can charge at home, on the road, or from any solar charging kit that offers 12V output.

You can purchase your PowerEx 9V batteries [here](#).
