Product Summary

Tiny is the word on this one. Solar charged, with a dynamo handle on the back for times when the sun doesn't shine. Yes, it is actually a good little radio. The dynamo is quite smooth, and the reception is very good for a radio of its size.

Product Description

Mini size, built strong, with Kaito's standard sensitive reception. It picks up AM and FM very well, and also includes weather band reception which comes in handy during storms or listening to local conditions.

AM: 520 - 1710 KHz

FM: 88 - 108 MHz

Weather Band: 162.40 - 162.55 MHz

Power Sources: Dynamo Cranking, Solar Panel (internal battery)

Earphone Jack
