Product Summary

MNDC15 Breaker Box

General use enclosure for 15 panel mount type breakers from 5 - 100 Amp as well as a single 175 or 250 amp breaker if so desired.

Product Description

MNDC15 Breaker Box

General use enclosure for 15 panel mount type breakers from 5 - 100 Amp as well as a single 175 or 250 amp breaker if so desired.

NOTE: Busbars and breakers sold separately

When wired as a DC distribution centre the main positive (Do not break the negative) connects to the optional 175 or 250 amp breaker and then to one or more of the optional busbars for distribution to the individual breakers and out to the loads. Observe the polarity markings on the large breaker and make sure that the breaker is in the off position before making any connections. The optional busbars may be used for distributing the negative side as well. Busbar supports are available in appropriate colours to denote polarity.
