Product Summary

The MNDC250 250A DC Wiring Panel & Inverter Disconnect by Midnite Solar is a DC disconnect that provides overcurrent protection for any single inverter (250A panel mount breaker is included). The **MNDC250** comes with a DIN rail for five additional

DC breakers for DC loads, a charge controller disconnect, and a battery-status monitor. They also include a ground bus, and a 5/16" bonding battery-negative stud. Mounting holes for a 500 A shunt are built in.

Product Description

The MNDC250 250A DC Wiring Panel & Inverter Disconnect by Midnite Solar is a DC disconnect that provides overcurrent protection for any single inverter (250A panel mount breaker is included). The **MNDC250** comes with a DIN rail for five additional DC breakers for DC loads, a charge controller disconnect, and a battery-status monitor. They also include a ground bus, and a 5/16" bonding battery-negative stud. Mounting holes for a 500 A shunt are built in.

The white powder-coated aluminum chassis measures 10"H x 5"W x 18"D and weighs 7 lbs. Other main-breaker sizes are available. Left-side main-breaker placement is available by special order.
