Product Summary

The MT6 Manual Tilt Solar Tracker by BenjMech is a made in Canada solution for maximizing the energy harvest from your solar array. Designed specifically for smaller off-grid systems, the MT6 is a cost-effective tracker suitable for cabins, cottages, and research stations.

Product Description

The MT6 Manual Tilt Solar Pole Mount by BenjMech is a made in Canada solution for maximizing the energy harvest from your solar array. Designed specifically for smaller off-grid systems, the MT6 is a cost-effective tracker suitable for cabins, cottages, and research stations.

MT6 Manual Tilt Features

- Fast set-up with fewer parts than conventional racking - Sheds snow effectively - it's made & tested in Manitoba - Seasonal tilt performed in seconds - Efficient Use Of Space : Use 6 modules in a smaller footprint than 8 modules

in a static ground mount [Quad Pod](#)] or Pole Mount installation options

Solar Module Compatibility

Up to 6 x 60-cell models

Requires: 6x 10' Kinetic Solar rails & associated hardware for attaching the rails to the MT6 & the solar modules to the rails (quoted separately).

Engineering Specs...

Engineered to Canadian building standards

Warranty...

1-Year limited warranty

Designed & built in Canada

NOTE: Larger custom mounts are available - [send us an email](#)!

Additional Mounting Notes

The MT6 manual tilt top-of-pole mount can be mounted to 6" pipe, or where the ground does not allow for drilling, use either of the following options...

Quad Pod : 4-Legged telescopic base. Each leg can be anchored

12" Base Plate : Secure this base plate to a concrete slab, or anchor to rock using bolts and epoxy.

Product Attributes

- Dimensions: 1 × 1 × 1 cm
- Weight: 9.9 kg
- Component: MT6 Manual Tilt Pole Mount Head, 6-Module Racking Set (60/72-Cell)
