Product Summary

This generic charger offer you the ability to charge your Olympus BLN-1 battery packs from your 12V car cigarette socket, your 12V solar panel or portable solar charging system, or a home wall outlet.

Product Description

Unlike the Olympus BLN-1 charger that came with your Olympus camera, this generic charger offers far more versatility for people on the go.

This generic charger is small & light, and easy to pack along. The AC outlet prongs fold down, the unit is only about 2 x 2 x 3" in size, and weighs next to nothing.

Using Generic Chargers with Olympus-branded batteries...

This charger will charge Olympus BLN-1 batteries with no concerns.

Using with solar

Simply plug the charger's cigarette adaptor into your solar panel, and place the panel in the sun. Note that for solar-direct use, a panel of 5 watts or more is recommended for reasonable charging times.

When you want to plug directly into a solar panel, any panel providing 5 to 15 watts will do the job well. All that is needed is a 12v CLA power socket outlet (like the socket in your car's dashboard). More powerful panels will be able to charge faster.

Don't want to be at the mercy of the sun? Simply put a battery pack between the solar panel & this charger. Using an intermediate battery pack will capture & store more of the solar power and allow the charger to operate at full speed whenever you need to use it... day or night.

Specifications

Charging & completed indicator lights

Input Range
