Product Summary

This is the Orion-Tr Smart 12/12-18A (220W) Isolated DC-DC charger by Victron Energy. Popular with RVs and van conversions where you may be using lithium house batteries that need a dedicated charger to interface with the vehicle's

alternator. This is a professional 3-stage adaptive charger with built-in Bluetooth, so you are able to set-up, control, and monitor your charger from your smart phone.

Product Description

This is the Orion-Tr Smart 12/12-18A (220W) Isolated DC-DC charger by Victron Energy. Popular with RVs and van conversions where you may be using lithium house batteries that need a dedicated charger to interface with the vehicle's alternator. This is a professional 3-stage adaptive charger with built-in Bluetooth, so you are able to set-up, control, and monitor your charger from your smart phone. The Victron Orion-Tr charger can be remotely switched on or off via Bluetooth and has an engine running detection mechanism. This built-in engine shutdown detection stops the charger when the engine is not running to prevent any discharge from your starter battery. No additional battery isolation relay needed.

Orion-Tr Smart 12/12-18A Features

The Orion-Tr smart DC-DC charger is short circuit proof and, multiple units can be paralleled with additional Orion chargers to increase the output current. High-temperature protection by reducing the output current at high ambient temperature.

IP43 protection

Easy installation with screw terminals

Adaptive 3-stage charge algorithm: bulk - absorption - float

Compatible with lead-acid and lithium batteries

.
