The PanelSW switches are easy to install backlit panel mount On/Off DC power switches for DIY projects. Typically used to switch accessory circuits such as USB ports, or lights.. Available in red and blue colors. Rated at 15A @ 12VDC. Rear mounted F2 faston blade type connections. Fits standard 1-1/8" diameter hole.

Product Description

The PanelSW switches are easy to install backlit panel mount On/Off DC power switches for DIY projects. Typically used to switch accessory circuits such as USB ports, or lights.. Available in red and blue colors. Rated at 15A @ 12VDC. Rear mounted F2 faston blade type connections. Fits standard 1-1/8" diameter hole.

PanelSW 12V DC Switch Features

Switches illuminate in the ON position. Rated at 15A @ 12VDC continuous. DC power input via (3) rear mounted F1 faston tab (blade type) connections.

Switch separates from panel housing and can be mounted separately or together. When mounted separately the switch fits in a 25/32" hole. Fits Powerwerx optional PanelPod1, PanelPod2, PanelPod3 housings, Two, Three or Four Hole Panel Mounting Plates or standard 1-1/8" diameter hole.

Includes lighted switch, panel mount switch housing, rear threaded nut and (3) blade type connectors.

Current Draw: 15mA for LED

Rear housing depth: 15/16" (with quick disconnect tabs)
