Product Summary

This is the REC365TP4, a premium 365W all-black solar module by REC. REC is a European brand with a long history of leadership and innovation in solar. TwinPeak 4 Black Series feature an aesthetically-pleasing full-black design with high panel efficiency and power output, enabling customers to get the most out of the space

used for the installation.

Product Description

This is the REC365TP4, a premium 365W all-black solar module by REC. REC is a European brand with a long history of leadership and innovation in solar. TwinPeak 4 Black Series feature an aesthetically-pleasing full-black design with high panel efficiency and power output, enabling customers to get the most out of the space used for the installation.

When you care about both the strength and beauty of the solar array you build, REC TwinPeak 4 modules are one of your leading options. The 30mm all-black frame is low-profile, which gives the modules a sleek appearance on your roof. Combined with all-black hidden racking from [Ironridge](#)], and you have a winning combination. Notice the additional crossbars on the back of the REC module frame. These provide the additional strength to handle all that our robust Canadian climate can throw at them. The 20-year product, and 25-year output warranty is further proof.

Combined with industry-leading product quality and the reliability of a strong and established European brand, REC TwinPeak 4 Black Series panels are ideal for residential and commercial rooftops.

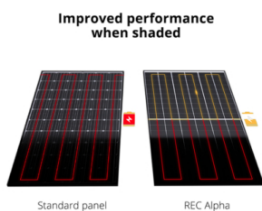

REC365TP4 TwinPeak 4 Features

REC TwinPeak 4 features REC's innovative design with the high panel efficiency and power output of monocrystalline cells, enabling you to get more out of the space available - helping to lower your energy bills and shorten the payback time through increased yield and lower costs.

MORE POWER OUTPUT PER SQUARE FOOT

REC TwinPeak 4 panels are packed with the same advanced REC TwinPeak technologies that have won REC multiple awards. This p-type mono variant offers higher power output per square foot of panels installed.

MORE PERFORMANCE IN SHADED CONDITIONS

]

Panels with REC TwinPeak technologies have a unique “twin” design, which enables them to generate electricity even when they are partially shaded. Over time, you get a higher yield from your installation.

MORE COST EFFICIENT

By delivering more power per square meter, you need fewer REC TwinPeak 4 panels to generate the same power. This means quicker installation times and the need for fewer components such as clamps and racks. All of which reduces your overall costs, shortening the payback time.

SUPER-STRONG FRAME DESIGN

]

REC TwinPeak 4 come with extra support bars across the rear of the panel, greatly boosting its strength and durability, and allowing loads of up to 7000 Pa - far exceeding the 5400 offered by conventional panels. This added strength enables you to achieve much higher energy yields. Combined with a 30 mm frame height, this frame design enables flexible installation options, making overcoming every obstacle easier during system design.

REC365TP4 TwinPeak 4 Specifications in Brief

Power : 365W

Sorting : 0/+5W

Max Power Voltage (Vmpp) : 34.3V

Max Power Current (Impp) : 10.65A

Open Circuit Voltage (Voc) : 40.8V

Short Circuit Current (Isc) : 11.32A

Total Panel Efficiency : 20.0%

Cell Type : 120 half-cut mono crystalline, p-type

Glass : 3.2mm solar glass with antireflective surface

Back sheet : Black, high-strength poly

Frame : Black anodized aluminum

Cables/Connectors : 1.1m PV cable, MC4

Dimensions : 1755 x 1040 x 30mm

Weight : 20kg

Warranty

Product : 20 Yrs

Output : 25 yrs

Founded in 1996, REC Group is an international pioneering solar energy company dedicated to empowering consumers with clean, affordable solar power. As Solar's Most Trusted, REC is committed to high quality, innovation, and a low carbon footprint in the solar materials and solar panels it manufactures. Headquartered in Norway with operational headquarters in Singapore, REC also has regional hubs in North America, Europe, and Asia-Pacific.
