Who Is Roof Tech?

Roof Tech is the first U.S. subsidiary of Yanegiken, a company renowned in Japan for more than four decades of innovative roofing technologies. Roof Tech brings these unique PV mounting solutions to the U.S. solar market. Headquartered in Southern California, our national sales teams are in place to provide superior service to installers and solar panel distributors throughout North America.

Roof Tech's legacy is linked directly to Yanegiken Technology and Research Institute, our parent company in Japan, which was founded in **1968** to conduct research and development of new roofing technologies. Renowned for its culture of technical excellence and superb customer service, Yanegiken has earned a national reputation as a reliable provider of roofing solutions.

Yanegiken specializes in roofing technologies and solar panel fittings that can withstand the most extreme weather conditions. Roof Tech products are based on Yanegiken's own development and manufacturing capabilities representing more than four decades of research data.

Over the years, Yanegiken has established joint development agreements with some of the world's leading manufacturers of solar power systems, including Mitsubishi, Sanyo, Sharp, Panasonic, and Kyocera.

Yanegiken earned its ISO9001: 1994 Certification in 2000, and its ISO14001: 2004 Certification in 2006.
