### Product Summary

The S-5-U Metal Roof Attachment Clamp is by far S-5!'s most popular and most versatile clamp. The S5U fits about 85% of the standing seam profiles manufactured in North America—including most structural and architectural profiles. Also provide both top & side bolting locations.

## Product Description

The S-5-U Metal Roof Attachment Clamp is by far S-5!'s most popular and most versatile clamp. The S5U fits about 85% of the standing seam profiles manufactured in North America—including most structural and architectural profiles. It can be used on vertically oriented seams and, by rotating the clamp 90 degrees, it can also be used on most horizontal 2" seam profiles.

Its simple design, generous dimensioning, and multiple hole orientations are what make the S-5-U clamp so versatile for use with the S-5!® snow retention products, such as ColorGard®, as well as with other heavy-duty applications. Installation is as simple as setting the specially patented round-point setscrews into the clamp, placing the clamp on the seam, and tightening them to the specified tension. Then, affix ancillary items using the bolt provided with the product.

### S-5-U Specifications

S-5-U Clamps accommodate **most standing seam profiles** in North and South America, including structural and architectural profiles

Use on **vertically-oriented seams**, OR

Rotate clamp 90° for use on **most horizontal seam profiles** w/ horizontal projection  $\geq 0.65$ " (16.5 mm)

Use for **heavy-duty** applications, such as snow retention

**Two T-30 Torx round-point setscrews (Torx bit tip provided) One M8 bolt included**
