## Product Variants

- Seagull X-1F Water Purifier - Residential ()
- Seagull X-1F Water Purifier - Marine ()

## Product Summary

When it comes to premium water 'purifiers', nothing is more practical or affordable than the Seagull X-1F water purifier series from General Ecology. Note that this is an EPA certified 'purifier' that stands heads & shoulders above common carbon filtration & reverse osmosis systems.

## Product Description

General Ecology Seagull X-1F Water Purifier with standard chrome faucet

Undersink model with standard chrome faucet.

The difference is not just the compact size & simplicity of installation, but more importantly the fact that the Seagull IV X-1F will remove both viruses & bacteria from your water in addition to an incredibly wide range of toxic chemicals, pesticides, herbicides, metals, & sediment - something those other systems cannot do without secondary filter & chemical disinfection stages.

The most compact series in the Seagull line, the X-1F series are easy to install using included hardware, and are small enough to be placed out of the way in small kitchens & galleys. A variety of installation configurations & faucet hardware

is available to meet your needs. Kits include: stainless X-1 pressure vessel, white braided high pressure quick-connect lines, "Structured Matrix" purification cartridge, & lead-free faucet with ceramic disk valves & lifetime finish. General Ecology's unique "Structured Matrix" technology is comprehensively effective in removing all 3 classes of microbiological contaminants (cysts, bacteria, and viruses). Also effective in removing a wide range of specific chemical contaminants, including pesticides, herbicides, industrial solvents, chlorine, foul tastes and odors, instantly, without chemicals. Certified to meet the EPA's very rigorous Microbiological Standard for Drinking Water Purifiers. Seagull X-1F Water Purifier Specifications...
