## Product Summary

SolaDeck 0786-41 Rooftop Combiner. The easy way to have your PV solar array strings combined at the point of roof penetration.

## Product Description

SolaDeck 0786-41 DC rooftop solar PV combiner. The easy way to have your PV solar array strings combined at the point of roof penetration.

**REPLACED BY THE 0799 MODEL - [CLICK HERE](#)**

SolaDeck 0786-41 Features...

- 6" Slotted din rail installed

ETL listed and labeled to the [UL 1741 Standard](#)] - Rated 600 volt 120 amps (DC) - Combines PV strings (DC)

Options...

- Rail mounted fuse holders (sold separately) - Rail mount terminal blocks (sold separately) - Use 0784BB bus bar for fuse holders (sold separately) - Use 0785BB bus bar for (1451) terminal blocks (sold separately)

SolaDeck enclosures include din rail, ground blocks, and aluminum strain clip. All other internal parts are sold separately.

Why Use A SolaDeck Enclosure?

As the desire to utilize solar energy grows, so does the need for a convenient, virtually unnoticeable enclosure to penetrate the roof deck. SolaDeck both houses and protects the solar PV wiring for a fast, easy, and safe photovoltaic

wire installation.

Solar panel wiring can be installed with consistency, time savings, and confidence every time. Unlike other solar array wiring enclosures, SolaDeck incorporates a unique flashing that is a seamless part of the enclosure and prevents incorrect penetrations in the roof system.

SolaDeck 0786-41 Enclosure/Combiners Provide...

Flashed, seamless, weather-tight roof protection

Roof penetration standard in the roofing industry

Exceptional low profile design

Versatility to all PV systems

Consistency in every installation

A professional appearance to your PV installation

Models that are ETL listed and labeled to UL standards

Maximize your installation confidence by using SolaDeck.
