Product Summary

The TAP is Tigo's roof antenna for MESH networks. The TAP improves the data management of residential, commercial, and industrial solar systems by wirelessly communicating with smart modules.

Product Description

The TAP is Tigo's roof antenna for MESH networks. The TAP improves the data management of residential, commercial, and industrial solar systems by wirelessly communicating with smart modules.

Each TAP collects data from up to 300 TS4 units (~100kW systems) or up to 600 modules using TS4-R-X-Duo (~160kW systems). It also greatly improves safety with module-level deactivation for Rapid Shutdown. When paired with a CCA, the TAP provides unparalleled visibility into solar installations.

The highlights of TAP include:

- UL-Certified for Rapid Shutdown
- Outdoor rating of IP68
- Module-level deactivation
- High definition, sampling as low as every 2 seconds
- Scalable architecture
- Mounts easily on module frame without tools
- Simplified installation due to new & improved wiring compartment
- Available for new integrated & retrofitted/add-on systems

Tigo part# : 158-00000-02
