Product Summary

Trav-L-Pure Camper water purifier is the only "outside hookup" chemical-free purification system, specifically designed for "Pop Up" campers & smaller RV's that is certified to EPA Guide Standard for Microbiological Purifiers against bacteria, cysts, and viruses. No hold time, no electricity, no chemicals, & no double pumping required!

Product Description

The Trav-L-Pure Camper water purifier offers great tasting water for drinking and cooking needs without the expense or hassle of bottled water. Just purify water direct from campground source. Each purification canister has an average rated capacity of 570 litres - that's just 15¢ a litre, quite a bargain compared to the \$1.50 or more price tag of national bottled water brands. A minimum 20 psi water pressure provides top quality drinking water at 0.5 gallon per minute flow rate without the worry of that "campground" taste or the hassle of lugging around bottled water

Specifications...

Flow rate: 0.5 gal/min 1.9 l/min

Cartridge Capacity: 125 gal 475 L based on typical wilderness water sources

Micron Retention: 0.1 micron nominal 0.4 micron absolute

Operating Temp: 33F (0.5C) to 100F (38C)

Working Range: 25-100 psi 33-100 F (0.5-38 C)

Dimensions: 5.2 x 3.2 in 13.2 x 8 cm

12 oz 340g

The Trav-L-Pure Camper 'RV' water purifier has a canister that is a self contained purifier and installs in seconds. Mounted externally, in-line with ordinary garden hose threads, this purifier can be removed and stored safely inside a camper just as easily once water consumption for drinking and cooking is complete. No tools necessary!

Note: The Trav-L-Pure camper is designed for small RV's or "Pop Up" campers for outside hookup to campground

water sources. For larger vehicles, with water storage tanks, we recommend our point-of-use Nature Pure or Seagull IV water purifiers.

General Ecology's unique "Structured Matrix" technology is comprehensively effective in removing all 3 classes of microbiological contaminants:

Cysts (ie. cryptosporidia, giardia)

Bacteria (ie. e.coli, fecal coliform)

Viruses

The First Need is also effective in removing a wide range of specific chemical contaminants, including...

Pesticides

Herbicides

Industrial solvents

Chlorine

Foul tastes and odors

The Trav-L-Pure does all this instantly, with no hold time, and no chemical treatment. The First Needs are fully certified to meet the EPA's very rigorous Microbiological Standard for Drinking Water Purifiers.

Water is the Essence of Life...General Ecology Inc.'s only business is drinking water purification. Manufactured in the USA from the finest raw materials, our water purifiers are ecologically and environmentally compatible; they purify naturally without adding chlorine, iodine or other pesticides to the water you drink and use in your foods and beverages. General Ecology Inc.'s "Structured Matrix" is the only technology certified to meet US EPA Purification Standards against all three classes of waterborne disease organisms - parasitic cysts, bacteria and viruses - instantly, without pre/post treatment, without wasting water and without electricity. Outstandingly effective, they also remove chemical and aesthetic contaminants, providing superbly refreshing, spring-like water for a naturally healthy life-style.

Replacement Parts

Replacement canisters available. See the order form. The Trav-L-Pure can also be purchased with an additional 90-degree elbow accessory for mounting the purifier cartridge in a vertical orientation on the side of your camper or RV.
