Product Summary

The Trek North 0 assumes that you are going somewhere where a solar panel won't be of much use. Either too wet, or too dark. But, you need to pack along some extra power, and don't want to add much weight, and don't like the cost of buying a bunch of spare batteries. The Trek North 0 is your solution.

Product Description

The Trek North 0 assumes that you are going somewhere where a solar panel won't be of much use. Either too wet, or too dark. But, you need to pack along some extra power, and don't want to add much weight, and don't like the cost of buying a bunch of spare batteries. The Trek North 0 is your solution.

The flexibility to add a solar panel in the future is always available to you.

This package comes charged & ready to use.

Charge from your vehicle at the trailhead, or from home before you leave. Charge all types of 12V devices, plus just about every USB device imaginable, plus just about every laptop (Apple MagSafe connector is optional - see options below).
