Product Summary

This is a compact tabletop 2-Speed, 2-Motor USB fan for your home away from home. Ideal for cabins, cottages, or family camping in the heat of summer. The twin motors each drive 5-blade rotors creating an ultra-quiet flow of air. Dual speed control, and convenient USB power.

Product Description

This is a compact tabletop 2-Speed, 2-Motor USB fan for your home away from home. Ideal for cabins, cottages, or family camping in the heat of summer. The twin motors each drive 5-blade rotors creating an ultra-quiet flow of air. Dual speed control, and convenient USB power.

Innovative Design...

The motors rotate their blades in opposite directions, but pushing air in one direction. This dual design results in very quiet operation.

USB Powered...

This fan can be used with any USB power source: portable battery, laptop port, wall adaptor, car adaptor.

Solar-Direct Option...

It can also be driven directly from a USB solar panel (we've tested it with as small as a 6W panel in November, but a 3W solar panel is recommended for summer use). The [Voltaic 2W](#) or [3.5W](#) panels are a good match for summer sun.

Consider this your entry-level solar-powered air conditioner!

USB Fan Specifications...

Input : 5V USB

Power Consumption : 0.9W / 1.05W

Height : 13.5cm

Depth : 7cm

Cage size : 9.75cm

Blade Diameter : 8.5cm
