Product Summary

The VE.Bus Smart dongle is two products in one. First, it is the Bluetooth accessory for the Victron range of inverter/chargers: Multi, MultiPlus, MultiPlus-II, MultiGrid, MultiGrid-II, Quattro, and the Victron series of Phoenix Inverters with a VE.Bus port. When installed, use the VictronConnect App to monitor operation and also operate the system: change the input current limit as well as switch between Off, On and Charger-only modes.

Product Description

The VE.Bus Smart dongle is two products in one. First, it is the Bluetooth accessory for the Victron range of inverter/chargers: Multi, MultiPlus, MultiPlus-II, MultiGrid, MultiGrid-II, Quattro, and the Victron series of Phoenix Inverters with a VE.Bus port. When installed, use the VictronConnect App to monitor operation and also operate the system: change the input current limit as well as switch between Off, On and Charger-only modes. Second, the VE.Bus Smart Dongle can work as a Voltage and Temperature sense device for the inverter/charger. This works with all models.

Victron part number : **ASS030537010**

For monitoring, the device is a great alternative in caravans, smaller yachts and motor homes for which the Color Control GX or Venus GX are a step too far.
