Product Summary

One of Voltaic's standard output cables. Connects any USB port to any Voltaic 3.5x1.1mm adapter (all the Voltaic phone adapters are this size). Cable is male USB on one end, female 3.5mm x 1.1mm on the other end.

Product Description

One of Voltaic's standard output cables. Connects any USB port to any Voltaic 3.5x1.1mm adapter (all the Voltaic phone adapters are this size).

Cable is male USB on one end, female 3.5mm x 1.1mm on the other end.

DIY NOTE: The barrel end of this cable fits the standard/original Nokia barrel. So, if you have a dynamo or solar device that only came with a few phone connectors including the Nokia, you can use this Voltaic cable in reverse to create a male USB connector output from your dynamo/solar charger device. You can then use a female-female USB connector to convert this male USB end of the cable to a standard USB port (note that for pin-out reasons, this solution will work for standard USB devices, and many smartphones & androids, but it will not be Apple compatible).
