Product Summary

One of those hardware pieces that comes in handy when attaching to fibreglass sheeting, thin plywood, and other thin materials. Well Nuts are installed blind, with the outer rubber casing getting drawn back behind the sheeting material to provide a weather tight seal as well providing a grip that dampens vibration. Various sizes and thread are available to suit your application.

Product Description

One of those odd hardware pieces that comes in handy when attaching to fibreglass sheeting, thin plywood, and other rv and boat roof materials. Well Nuts are installed blind, with the outer rubber casing getting drawn back behind the sheeting material to provide a weather tight seal as well providing a grip that dampens vibration. Various sizes and thread are available to suit your application.
