Product Variants

- XR10 Rail by Ironridge - 66" Black ()
- XR10 Rail by Ironridge - 84" Black ()
- XR10 Rail by Ironridge - 102" Black ()
- XR10 Rail by Ironridge - 132" Black ()
- XR10 Rail by Ironridge - 168" Black ()
- XR10 Rail by Ironridge - 204" Black ()
- XR10 Rail by Ironridge - 66" Clear ()
- XR10 Rail by Ironridge - 84" Clear ()

- XR10 Rail by Ironridge - 102" Clear ()
- XR10 Rail by Ironridge - 132" Clear ()
- XR10 Rail by Ironridge - 168" Clear ()
- XR10 Rail by Ironridge - 204" Clear ()

Product Summary

Still think all rails are the same? After reading about the Ironridge XR10 rail, you'll quickly see how lacking other rails are. Simple, affordable, and great looking! This is the page highlighting the Ironridge XR10 rails. The ideal choice for residential rooftops & DIY projects.

Product Description

Still think all rails are the same? After reading about the Ironridge XR10 rail, you'll quickly see how lacking other rails are. Simple, affordable, and great looking! This is the page highlighting the Ironridge XR10 rails. The ideal choice for residential rooftops & DIY projects.

Ironridge created the XR series, because solar is not always sunny.

Over their lifetime, solar panels experience countless extreme weather events. Not just the worst storms in years, but the worst storms in 40 years. High winds capable of ripping panels from a roof, and snowfalls weighing enough to buckle a panel frame.

XR Rails are the structural backbone preventing these results. They resist uplift, protect against buckling and safely and efficiently transfer loads into the building structure. Their superior spanning capability requires fewer roof attachments, reducing the number of roof penetrations and the amount of installation time.

Ironridge XR10

Unique Shape... Exceptional Strength

The Ironridge XR10 features a force-stabilizing curve on one side of the rail extrusion.

Sloped roofs generate both vertical and lateral forces on mounting rails which can cause them to bend and twist. The curved shape of XR Rails is specially designed to increase strength in both directions while resisting the twisting. This unique feature ensures greater security during extreme weather and a longer system lifetime.

Dimensions

Available lengths: 11', 14', 17'

Profile Height : 1.75"

Profile Width : 1"

Corrosion-Resistant Materials

XR Rails are made of 6000-series aluminum alloy, then protected with an anodized finish. Anodizing prevents surface & structural corrosion, while also providing a more attractive appearance.

Compatibility With All Attachments

Ironridge XR rails are compatible with the Ironridge FlashFoot 2 roof attachment, or any others on the market such as [Quick Mount PV](#)], [S-5](#)], and the [RT-Mini](#)].

Order the Bonded Square Bolt hardware to attach the XR Rails to any L-Foot.

Splices For Longer Arrays

The XR Series Bonded Splice is available to join XR rails.

Rail End Caps

Finish your rail ends neatly with plastic end caps.
