Product Description

The Goal Zero Yeti 1000 Lithium Portable Power Station is an exciting addition to the popular Yeti line of portable power systems. Based on the latest lithium power storage, the Yeti 1000 Lithium packs more power in a smaller, lighter box. With universal USB ports, household AC outlets, and 12V car socket, the Yeti 1000 Lithium is able to power just about anything.

REPLACED IN 2020 BY THE [YETI 1000X](#) **FREE Shipping**

Perfect for weekend trips to the cabin, back-up applications, tiny houses, and medical device support. Charge it from [Goal Zero solar panels](#)], or other brands. The Yeti 1000 Lithium is even more powerful than its predecessors with increased surge allowances, advanced battery protection and a sleek design that makes for a lightweight, big power solution. With user replaceable lithium packs and increased shelf life means you are ready for any type of project.

[See the promo video showing the Yeti in action... CLICK HERE](#)] **View The Tech Video** to hear more about the Yeti Lithium right from the engineer that designed it. Yeti 1000 Lithium Features...

Instant power at the push of a button. Silent and powerful 1045Wh, 96.8Ah (10.8V) lithium battery.

No more extension cords, no more gasoline, no more fumes with multi-stage patent pending 1500W AC inverter.

Versatile powering options including: four USB ports, two AC outlets and 12V output.

Informative display featuring a runtime/recharge time estimator, as well as a battery level monitor and an output/input meter.

Using Your Yeti 1000 Lithium...

Charging The Yeti From The Sun

The Goal Zero Yeti 1000 Lithium can be charged by connecting a compatible solar

panel.

If you are a standard or light user and use about 30-40% of the power per day we recommend 1 Boulder 100 Solar Panel. If you are a heavy user using all the power in one day, we recommend using 6 Boulder 100 Solar Panels to recharge.

We can also help you to configure your Yeti to charge from just about any solar module, Goal Zero or other brands. In Canada we recommend [thin film modules](#)] for optimum low-light & partial shade conditions.

Need help determining the right solar solution for your Yeti 1000? [Send us a note!](#)

Charging The Yeti From The Wall

Plug it into the wall. Fully recharges in 4 hours using the Yeti Fast Charge 25 Amp Power Supply, or in 18 hours using included power supply. Note that these numbers are only if you were to totally drain the battery, which is never a good idea... keep it topped-up so you always have power available & the batteries stay healthy!).

YES! You can charge your Yeti with solar panels, and a wall charger at the same time.

Charging From Your Vehicle...

The Goal Zero Yeti 1000 Lithium can be charged in 9 - 18 hours by plugging into your vehicle's 12V outlet using the [Goal Zero Yeti Lithium 12V Car Charging Cable](#)].

IMPORTANT NOTE: Do not attempt to charge your Yeti Lithium from a 12V source using any other cable. Doing so may cause damage to the unit.

What Can You Power?

Smartphones, Lights, Camera Equipment, Tablets, 12V Appliances, Laptops, CPAP machines, Display Monitors, tools, etc.

Charge All Your USB Devices

4 high-speed USB ports (2.4A). Great for your phones, tablets, and wearables.

Power Your 12V Car Accessories

The 12V best charges all your 12V powered devices. (10A, 120W max)

Use The Built-In AC Outlets

Plug in your equipment just as you would the wall at home. There are two AC

Outlets.

Pure-sine wave output, 1500W, (3000W surge)

.

How Much Is 1000WHrs (Watt-Hours)?

Smartphone 50+ Recharges

POV Camera 165+ Recharges

Headlamp 165+ Recharges

Tablet 37+ Recharges

Laptop 17+ Recharges

Light-a-Life 335+ Hours

Fridge 17+ Hours

32 LCD TV 10 hours

.

How Fast Will My Devices Charge From the Yeti?

It takes the same amount of time to charge your device from a Goal Zero power pack as it does from the wall.

.

Some Advice To The Wise On Usage

When charging gear with the Yeti 1000 Lithium, take note of the LCD Battery Display. If you plug in devices that have a high power requirement (a large refrigerator), the charge level of the Yeti can drop very quickly and you may not get exactly 1000Wh of energy. Also, especially when using the AC power output, the Goal Zero Yeti will be converting the energy from the DC power of the battery to the AC power needed by your device. Although your Goal Zero Yeti has a highly efficient inverter, there is still some energy lost in the conversion and you will not get the full rated capacity of the battery.

.

Yeti 1000 Lithium Specifications...

Battery Details Cell Chemistry: Li-ion NMC

Peak Capacity: 1045Wh (10.8V, 96.8Ah)

Lifecycles: 500 Cycles to 80% (Discharge rate: 1C, full charge/discharge, Temp

25C)

Shelf-life: Keep plugged in, or charge every 3-6 months

Management system: PWM charge controller, low battery protection

Ports

OUTPUT...

USB port: 5V, up to 2.4A (12 W max), regulated

6mm port: 12V, up to 10A (120W max)

12V car port (CLA socket): 12V, up to 10A (120W max)

AC inverter (output, pure sine wave): 110VAC 60Hz, 10A (1500W, 3000W surge)

INPUT...

Charging port (8mm): 16-30V, up to 10A (160W max)

Power Pole Charging port (Anderson): 16-30V, up to 10A (120W max)

Expansion Module Port: Covered port under the lid. To be used with Goal Zero expansion modules only.

General Product SKU: 38004

Chainable: No

Weight: 40 lbs (18.1 kg)

Dimensions: 10.1 x 15.3 x 9.3 in (25.7 x 38.9 x 23.6 cm)

Operating Usage Temp: 32-104 F (0-40 C)

Warranty: 12 Months
